

LumenAI Enterprise Governance Suite v1.0.0

Final Executive One-Pager

Released - Production Validated - Evidence Backed - Portfolio Linked - Power BI Ready - GitHub Tagged - GitHub Released - Executive Governance Ready

Executive Summary

LumenAI Enterprise Governance Suite v1.0.0 is a production-validated healthcare quality governance platform designed for sterile processing, surgical services, vendor accountability, audit readiness, CAPA oversight, and executive quality governance. The suite connects audit signals, CAPA governance, vendor governance, Power BI exports, public portfolio evidence, and an executive dashboard into one integrated leadership-facing governance layer.

Released Product Modules

Strategic Positioning

LumenAI has expanded from a sterile processing inspection concept into an enterprise quality governance platform. The platform connects Audit Governance -> CAPA Governance -> Vendor Governance -> Power BI Analytics -> Portfolio Evidence -> Executive Interpretation.

Final Executive Statement

The LumenAI Enterprise Governance Suite v1.0.0 is released, production validated, evidence backed, portfolio linked, Power BI ready, GitHub tagged, GitHub released, and executive governance demonstration ready. This release represents a complete investor-ready milestone for LumenAI's enterprise healthcare quality governance platform.
